The stock market was steady to-day, without articular animation. Some operators who bought for the rise a few weeks ago, and sold out on Monday and Tuesday, are anxious to see a decline, so as to renew their operation; but the purchases of outside parties and the natural effect of the increasing traffic on the railroads operate against a prolonged At the opening this morning there was a lively inquiry for Galena, Rock Island, Michigan guareed, and Illinois Central, and all these stocks sold at the best prices of yesterday afternoon. At the close of the first board, the sellers caused the rket to decline a fraction; in the afternoon there vas very little business done, and prices were generally rather lower, closing dull at the decline. Rock bland was hammered on advices of a judgment against the Missouri and Mississippi Railroad mpany, condemning the Rock Island bridge; the Company long ago appealed from this decision. Michigan guaranteed continues to be bought in view of the probable re organization of the Board of Direction and the re. very of the property from the slough into which thas fallen within the past year. New York Central continues to fluctuate in harmony with the rumore from Albany. It seems to be generally understood that if the House Toll bill passes the road will not be able to pay over five per cent per annum in dividends, and would, in such a case, be dear at 70 per cent. The inquiry for State stocks and approved bonds continues very active; all that are the market are readily taken, and several classes of bonds which have been in disfavor for some e are beginning to be inquired after. The desing quotations of the day were: - Virginia 6's, 984 a 1; Missouri 6's, 80 a 1; Canton, 204; Cumber land preferred, 13} a 14; Pacific Mail, 97ha i; New Work Central, 74 a 2; Erie, 9 a 10; Hudson Miver, 38} a 2; Harlem, 92 a 2; Harlem preferred, 34 a 2; Reading, 41 a 2; Michigan Central, 41 a 4; Michigan Southern and Northern Indiana, 9/ a 10; do. guaranteed, 21 a 4; Panama, 1334 a 134; Illinois Central, 62 a 4; Galena and Chicago, 61 a 4; Oleveland and Toledo, 20% a 21; Chicago and Rock leiand, 641 a 65.

The import entry of dry goods for the week ending to-day was less than that for the corresponding week of last year, the figures being \$2,627,000 against \$3,530,000 same week last year, and \$1,235,000 same week of 1858. This, however, is probably an accident, due to the non-arrival of steamers freighted with French and German goods. The aggregate import since January 1 is \$33,175,000, against \$31,080,000 to same date last year, and \$12,582,000 to same date of 1858. The year's imports of dry goods will undoubtedly be in excess of last year's.

in advance of the May meeting. We make room for a few paragraphs:—

The earnings of the road in 1859 were \$2,114,448 98, and in 1858, \$1.576,578 52. In the early part of the year the distress in illinois, from the failure of the harvest of the two preceding years, caused such macuivity in business that our traffic diminished even from the low figures of the preceding year. For the first eight months the decrease was \$85,091 23. In September, after the wheat harvest, business improved, and in the last two months the Indian corn crop coming opportunely, made up the deficit, and gave an increase of \$130,503 40 for the year. The lowest point in our affairs has apparently passed, and the very satisfactory increase of local traffic during six months ending 29th uit of \$224,209 41, confirms the estimate in the December circular of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a gain of 33½ per cent, or \$700,000 the presents of a large through freight traffic to the Northwest; the rivers were low, and merchandise was forced upon the rafflaws, which has not been the case since. Although the harvest of grain to the acre ultivated in 1859 was less than half of that gathered to the sare in 1856, the extended area under cultivation has above a better result in the exports from Chicago than was broughout, \$1,589, 321 bashels were shipped from Chicago; the past year (1859,) after two bad harvests, and such high prices that every available bushel of grain was broughout, \$1,589, 321 bashels were shipped from Chicago; the past year (1859,) after two bad harvests, and such high prices that every available bushel of

still continued, awaiting the decision of the Governor. The Republican of the 20th inst, says:—
Our streats have been filled with rumors that the Governor intended to veto this bill, and it is not to be concealed that great anxiety has been created smerng all classes by the bare ungreation of each a termination to the labors of this called session. We have, as our leaders know, given no currency to these rumors. We did not feel warranted in deling it, upon any such toose authority, by any act in Governor Stewart's like. We have not believed, and do not believe now, that he will surn his back upon his past history—reject and cast off his own offspring, as it were—refuse to confirm the very act of the Legislature which in his proclamation, be bad summoned them to enact-unless for better reasons than any we have beard suggested. Ho is excitled to time to consider of this question, just as the Legislature took time to mature and present it to him, and we hope soon to hear that it has received his approval and signature. The objection urgad by those who say he has it in contemplation to veto this bill is, that the Hannibal and St. Joseph Railroad Company is not refleved from the forfeiture of its charter, incurred by the violation of that provision of the law in regard to like albanking, which prohibits them from receiving or paying out small notes. Neither, so far as this is concerned, is the Pacific, or either of the roads named in the bill. They all stand on the same platform, and have stood there for years, as has nearly every either corporation in the State, and any argument of this kind, as against the approval of this bill, is wholly untenable. Governor Stewart will never give any such reason as this for a veto. So, too, in regard to the failure to include the Platte county road in the bill. The Legislature did not see its way clear, we may presume, in making provision for aid to this road, but surely that does not constitute a good reason for a veto.

A bill has been introduced in the Missouri Senate to exempt the railroad corporations from the penalties of an act adopted at a previous session, the St. Nicholas Hotel. The committee on the time | which imposes a forfeiture upon all such companies than five dollars.

The Chicago Press of Wednesday, speaking of business at the West and crop prospects, says:—

The weather during the week has been delightful, and the farmers throughout the West have been improving the season in sowing their wheat, cats and barley, and in preparing the ground for the corn crop. With regard the spring wheat, it is estimated that fully two-thirds of the crop has been sown; and never before—at least for many years—has the weather been so favorable. The intense heat of the sun has completely thawed out the soil, and rendered it thoroughly pliable, while the almost complete absence of rain has enabled agriculturists to push their work through without hindrance or delay. The reports with regard to the winter wheat crop are conflicting. In those actions where the seed was planted deep it is almost universally good, while in places where it has been carelessly sown and harrowed, it is generally poor, and will be a partial failure. The want of rain is, however, beginning to create fears that the Western rivers will not hold out long for the purposes of navigation. The upper Mississippi, which is not yet open to St. Faul, is fast failing, and the merchants of St. Louis are beginning to fear that their trade with the upper country will be curtailed in consequence. The same is true of the Illinois, and, in fact, to some extent, of all Western rivers. The receipts and shipments of produce, live stock, &c., during the past week, will be found in the following comparative table:— The Chicago Press of Wednesday, speaking of

A bill to aid, by Auburn, the construction of the Lake Ontario, Auburn and New York Railroad, has been reported in the Assembly. This bill contemplates the issuing of bonds by the city to the extent of \$100,000. The road, when completed from Ontario or Little Sodus Bay to Homer, will make miles. It will be nearer, taking the same starting point from the north shore of Lake Ontario, to New York than via the Grand Trunk of Caoada to Portland, by about 230 miles; and nearer to this city than by the Canada road to Boston, by 330 miles; also nearer to Boston, via this road, the New York Central, &c., than by the Canada road aforesaid, by 250 miles; and being also nearer to Boston than Ogdensburg. A saving of about two cents upon a bushel of grain, and ten cents on a barrel of flour, may be effected by this route, over the "Northern" railroad, that being about the difference in the freight from the head of the lake; besides a gain in the time, upon about 120 miles less of lake and river navigation. These advantages the Auburn people regard, and not unreasonably, as sollicient-ly important to command a considerable share of the carrying trade between the great Atlantic cities and the Northwest and upper lake country.

As to the Tolling and Pro Rata, the Auburn Adver-tiser indulges in the following sensible remarks; and as they emanate from a rural district and the home of Governor Seward, we copy them for the especial benefit of the advocates of those pernicious schemes, now attempted to be enacted for the especial beneat of canal jobbers, at the expense of the interest of this great city and State. Says the

importance to the city of New York to retain its hold most this vast and increasing trade, and provent, if possible, at being civerted to any great extent into other rival character. It is not the question which particular ratiroad or canally erest is to be reconsted that question is of

wise i lower, breadstuffs dall, and provisions steady. Details of the news will be found elsewhere. The money market is without change, the tendency being to increased ease. Loney is freely offered to the brokers to day at five per cent, and at the discount houses the complaint is of a scarcity of paper. Foreign exchange for to morrow's steamer is very at, the asking rates at the bankers' being loss at for sterling, and 5.161 a 171 for france. We hear of very few transactions at these figures,	with the exception of such free land bonds as 40) gor- rendered to the company in was ment for full pass shares, and the balance of the construction bonds due in 1875. The experience of the past year has confirmed the Board in the opinion ez- pressed in the last annual report, that it is not practicable to act with assistent promptees and efficiency in concert with a committee of shareholders in London, inasmuch as a decision upon the company's affaire cannot be speedily arrived all by correspondence; therefore the Board with consider their relations with the committee of the rest of the present committee concert in this opinion.
